## English

### Personal Summary

My name is Johan, born in '93, a guy with many diverse interests. I am particularly interested in web design, web development, and various types of programming. Rich in new ideas and solutions. I am also especially curious about new technologies and always interested in learning something new.

### Utbildning

- **Sep 2015 - Dec 2016 YH, Linux System Specialist, Hermods EC, Malmö**
- **Aug 2008 - Jun 2011 Gymnasium, Elprogrammet, IT inriktning, Jacobskolan, Hässleholm**
- **Aug 1999 - Jun 2008 Grundskolan, Bjärnums centralskola, Bjärnum**

### Skills

Linux, Docker, PHP, Laravel, Git, React, Redux, Angular, Python, JS, TS, CSS, SCSS/SASS, HTML5, Bash, Bootstrap, Materialize, Node/express, jQuery, MySQL, C#, CI/CD, Azure Devops, Jira, i18n, Tailwind, styled-components

### Employment

- **Sep 2022 - ongoing: Kvdbil**

TODO:

- **Feb 2018 - Sep 2022: Nerds of Sweden, Nerd/Developer**

This is where I have been for the past few years. Started with a position that was 100% outsourced to a client where I primarily worked on a React frontend hosted in an Azure environment. This lasted for about 1.5 years. Since then, I have worked on various projects where we have developed more custom web-based systems for different industries. It has also involved a delightful mix of different frameworks for both frontend, backend, and various hosting solutions.

- **Feb 2017 - Oct 2017: JG Software AB, DevOps/Web Developer**

Developed container-based systems and services such as Node.js APIs, web applications, and mobile applications for both Android and iOS.

- **Aug 2012 - Jul 2014: Part-time Employment, Property Department, Bergendahls Food**

Worked with everything from cleaning the warehouse to property maintenance, office services, and even being responsible for office supplies, mail, and packages.

- **Jun 2009 - Aug 2013: Summer Substitute, Property Department, Bergendahls Food**

Worked cleaning the dry, cold, and freezer storage, gardening, office services where I handled incoming/outgoing invoices, packages, and other mail, and was partly responsible for office supplies.

## Project/Services

Projects or services that I have developed or been involved in.

- **2022 Reception app**

PWA to perform car inspection on lease returned cars. Great tool to make sure any damages get documented to invoice customers correctly. Frontend Built in React with Vite.

- **2022 Cargo**

Internal administration tool used by KVD, administrates auctions, car transports, and much more. Frontend Built in React and Redux.

- **2022 Fleetmanager and Leasemanager**

Administration tool to administrate handling of the company's vehicles Frontend Built in Next.js and Redux.

- **2022 kvd.se and kvdcars.com**

KVD's online auction and marketplace. Frontend Built in React and Redux.

- **2021 - 2022 Dacke.Online**

Dacke.Online is an easy-to-use digital sustainability tool for inventory and e-commerce site for reuse of products and materials. Built in React and PHP Laravel.

- **Oct 2020 Decal editor with print and cutting export**

Project consisting of an image editor built in React and Fabric.js, and a PDF export compatible with both print and cutting machines. The rest of the site is built in WordPress and WooCommerce.

- **Jan 2020 - 2021? Resource rental admin panel**

Admin panel for resource booking system. Built in React.

- **May 2019 Lambertsson Online**

Admin panel and app for managing Peab's internally and externally rented tools, machines, and equipment in all possible construction and renovation projects. Built in Laravel, Angular, and NativeScript.

- **Sep 2019 - Dec 2020 Resource rental admin panel**

Admin panel for managing legal cases. Built in Lumen/Laravel and Angular.

- **Sep 2019 Satsa admin panel**

Admin panel for managing vandalism, primarily on trains. Built in Laravel/Lumen and Angular.

- **Feb 2018 – Sep 2019 Ontee** [ontee.com](http://ontee.com)

React frontend to Ontee's golf tee time booking engine system.

- **Feb 2018 – Sep 2019 Ontee** [app](#)

React Native Android and iOS application, client to Ontee's golf tee time booking engine. Mostly testing.

- **Feb 2018 – Sep 2019 Golfhäftet** [golfhaftet.com](http://golfhaftet.com)

I mostly upgraded the website to a more modern JS compiler and Bootstrap 4.

- **Feb 2018 – Sep 2019 Golfhäftet** [app iPhone](#), [Android](#)

Testing of Android version.

- **Feb 2017 - Oct 2017 Roadside** [roadside.nu](http://roadside.nu)

Case management software, used to administrate damage of truck trailers.

- **2017 Roadside Mechanical Interaction**  
[play.google.com/store/apps/details?id=nu.roadside.mi](https://play.google.com/store/apps/details?id=nu.roadside.mi)

Android application used by onsite mechanics. To execute a case job administrated and assigned from Roadside.nu.

- **2016 MailToPython**

Lia project I worked on during my Lia at JG software, the project was a whitelisted email that could send.

- **2014? Hässleholms mall intranet**

## Internships

- **2016 - Feb 2017: JG Software AB, DevOps**

This was during my vocational education as a Linux System Specialist, and during this period, I helped develop JG Software's web-based Fleet/Case management service. I also created a mail server called "MailToPython" written in Python. During my internship, I introduced Git to the company, which is now extensively used in all projects under development.

- **May 2014 - Jan 2015: Lindens Gård AB, Lindens Media Group**

Internship through the Employment Agency at Lindens Gård AB. Here, I worked as a web developer on various projects, the largest of which was a web-based "intranet" for Hässleholms Galleria, which I developed in object-oriented PHP, a search engine to find the nearest veterinarian, and many more. Unfortunately, it was a very disorganized workplace, and many of the projects were never completed before my internship ended.
